SOP 102 Safety Training

The Translational and Molecular Imaging Institute believes that safety is a fundamental component to all imaging research. The onus therefore, falls on each and every person involved in acquiring data, maintaining equipment and assisting subjects, to participate in safety at TMII. We have put forth a simple but thorough set of guidelines that anyone involved with using the TMII facilities must follow. The guidelines are in place not only for the safety of the subjects, but for you and the other research staff.

Facility Access

Level 1: For researchers who need to have access to the MRI suites in order to: configure peripherals for functional imaging, instruct subjects, run stimulation paradigms, collect physiological information, etc. This category is for those who do not need to operate the scanner and includes (but is not limited to) principle investigators, trainees, research assistance/nurses, veterinarian technicians etc.

Level 2a: For selected researchers who need to operate the scanner to run phantoms, non-human subjects, and/or optimize protocols.

Level 2b: For technologists & TMII scientists who have been trained to scan human subjects. Also, for physicists & engineers who develop/install/modify software and hardware. This is typically TMII scientists or investigators working with TMII technical scientists developing new tools.

5) Return the screening questionnaire to Chris Cannistraci (CSM s1-118). You will receive a MRI sticker to put on your badge when your training is complete.

Level 2a, 2b Qualifications:

1) Go through all the steps for Level 1

2) Must demonstrate thorough understanding of the current TMII MRI hardware, software and safety protocols

3) Must have a current Basic Cardiac Life Support (BCLS) certification

4) Meet with Cheuk Tang (Cheuk.Tang@mssm.edu) or Zahi Fayad (zahi.fayad@mssm.edu) to discuss details of your project

Annual Renewal

All personnel, regardless of level, must take an annual refresher course, “MRI for Researchers – Annual Renewal” found at http://intranet1.mountsinai.org/radiation/mrisafety.html

After successfully passing the renewal quiz, complete a new TMII MRI Non-Subject Screening Questionnaire and have it signed off on by a technologist.

Return the completed questionnaire to Chris Cannistraci.

Radiation Safety Training: Required only for users handling radioactive materials/subjects. Contact Radiation Safety officer at Dr. Jacob Kamen (Jacob.kamen@mssm.edu).

NOTE: Please reach out to Chris Cannistraci (christopher.cannistraci@mssm.edu) for any questions. The instructions for new projects are contained in SOP 101.
